8 Как найти абонента за NAT. Работа с abuse letters

Ищем конкретного абонента, на которого пришел внешний abuse. В письме с abuse, как правило, приведен "белый" адрес из NAT-пула, требуется понять кто из абонентов в известное время за этим NAT-пулом ходил на ресурс, где зафиксирована вирусная активность. Нужно сделать **2 шага** — найти в abuse письме необходимые признаки и по ним в GUI CKAT идентифицировать абонента.

Шаг 1. Ищем в письме

- 1. Адрес из своего NAT-пула (source IP).
- 2. Адрес атакуемого ресурса (destination IP)
- 3. Время активности на атакуемом ресурсе (с учетом часовых поясов!)

• Пример 1.

Это может помочь понять масштаб проблемы и выявлять аналогичные проблемы в сети.

Шаг 2. Ищем активность абонента в GUI СКАТ

Задача — определить по логам, какой абонент за NAT-пулом (source IP), указанным в письме, в это время обращался к адресу destination IP.

Перед началом поиска стоит проверить 2 факта:

1. Данный NAT-пул заведен на CG-NAT CKAT.
