This service is configured for individual subscribers by [fdpi_ctrl](#).

Instruction format:

```
fdpi_ctrl command --service 5 [список_IP]
```

The instruction syntax and IP addresses specification methods are described in details here: [Control instructions](#).

Examples:

Enable the "white list" operation for the particular subscriber:

```
fdpi_ctrl load --service 5 --ip 192.168.0.1
```

Disable the "white list" operation for the particular subscriber:

```
fdpi_ctrl del --service 5 --ip 192.168.0.1
```
