QoE NAT Flow

NAT Log is exported from [Stingray Service Gateway](#) and accumulates in [QoEStore database](#). These statistics are used to generate reports on user behavior in the event of a request from government agencies.

[More about configuring NAT statistics collection in QoE store](#)

Viewing raw NAT log

Go to: Main Menu → QoE Analytics → NAT Flow → Raw NAT Flow

The screenshot shows the 'QOE ANALYTICS / RAW NAT FLOW' interface. The left sidebar contains a menu with options like 'QOE dashboard', 'NETFLOW', 'CLICKSTREAM', 'GTP FLOW', 'NAT FLOW', 'SUBSCRIBERS', 'TRIGGERS & ALERTS', and 'ADMINISTRATOR'. The 'NAT FLOW' option is selected, and a sub-menu is open showing 'NAT FLOW' and 'RAW NAT FLOW'. The 'RAW NAT FLOW' option is selected, and the main area displays a table of NAT flow records. The table has columns for 'Source port', 'Destination', 'Destination', 'Post nat', 'Post nat', 'Login', 'Session ID', 'Net protocol', 'Event type', and 'DPI ID'. The records show various IP addresses and ports, with the 'Destination' column containing values like '5.253.103.136' and '17200'.

In the opened window you can select: period, DPI devices and manually set additional filters

The screenshot shows the 'QOE ANALYTICS / RAW NAT FLOW' interface with filters applied. The 'Period' is set to '8/26/2021 15:16 - 8/26/2021 15:31' and 'For all DPI devices' is selected. The table displays NAT flow records with columns for 'Time', 'Source IP', 'Source port', 'Destination', 'Destination', 'Post nat', 'Post nat', 'Login', 'Session ID', 'Net protocol', 'Event type', and 'DPI ID'. The records show various IP addresses and ports, with the 'Destination' column containing values like '5.253.103.136' and '17200'. The interface also includes a 'Reports' section on the right with a 'Raw NAT Flow' report.

Viewing Aggregated NAT Log

Go to: Main menu → QoE analytics → NAT Flow → NAT Flow

The screenshot shows the VAS Experts DPI interface. On the left, a sidebar menu lists various options: QoE, SERVICES CONTROL, QOE ANALYTICS, VAS CLOUD SERVICES, ADMINISTRATOR, Clickstream, Raw clickstream, Gtp flow, Raw Gtp flow, NAT flow, Raw NAT flow, Subscribers, Triggers & Alerts, and Administrator. The 'QOE ANALYTICS' menu is expanded, showing sub-items: QOE DASHBOARD, NETFLOW, CLICKSTREAM, GTP FLOW, NAT FLOW, SUBSCRIBERS, TRIGGERS & ALERTS, and ADMINISTRATOR. The 'NAT FLOW' item is selected, and a dropdown menu is visible with options: NAT FLOW, RAW NAT FLOW, and NAT FLOW aggregated log. The main panel displays a table of NAT flow records for the period 02/26/2021 15:41, filtered for 'For all DPI devices' and '10 minutes'. The table has columns: Source port, Destination, Destination, Post nat, Post nat, Login, Session ID, Net protocol, Event type, and DPI ID. The data shows multiple entries for different source and destination ports, all with a post-nat value of 5.253.102.119 and a session ID of 35768.

Source port	Destination	Destination	Post nat	Post nat	Login	Session ID	Net protocol	Event type	DPI ID
22	24536		5.253.102.119	0	35768	0	0	0	0
7.136	41843		5.253.102.119	0	35768	0	0	0	0
0	191.136.256.23	3342	5.253.102.119	0	35768	0	0	0	0
0	191.909.64.176	22243	5.253.102.119	0	35768	0	0	0	0
0	191.0.54.81	41414	5.253.102.119	0	35768	0	0	0	0
0	191.0.32.96	2293	5.253.102.119	0	35768	0	0	0	0
0	190.89.210.152	39225	5.253.102.119	0	35768	0	0	0	0
0	190.1.44.50	18257	5.253.102.119	0	35768	0	0	0	0
0	1.64.194.199	6881	5.253.102.119	0	35768	0	0	0	0
0	1.64.132.153	20001	5.253.102.119	0	35768	0	0	0	0
0	1.62.213.252	49912	5.253.102.119	0	35768	0	0	0	0
0	1.4.199.52	18024	5.253.102.119	0	35768	0	0	0	0

In the opened window you can select: period, DPI devices and manually set additional filters. In the right sidebar, you can choose to generate reports by Tops: Top Subscribers, Top IP-addresses of hosts, Top IP-addresses NAT

The screenshot shows the VAS Experts DPI interface with the 'NAT flow aggregated log' table. The table has columns: Time, Source IPV4, Source port, Destination, Destination, Post nat, Post nat, Login, Session ID, Net protocol, Event type, and DPI ID. The data shows multiple entries for different source and destination ports, all with a post-nat value of 5.253.102.183 and a session ID of 33080. The right sidebar contains a 'Reports' section with options: NAT flow aggregated log, Top, Top subscribers, Top hosts IPs, and Top post NAT IPs. The 'Top' option is selected.
