2 QoE Stor Logs

To go to the section, click the ADMINISTRATOR menu item, then click the QOE STOR LOGS menu item.

The screenshot shows the VAS Experts application window. On the left, there's a sidebar with various menu items under the 'Administrator' section, including 'QoE Stor logs'. The main area is titled 'QoE Stor logs' and shows a list of log files. One file is selected, 'clickhouse-server.err.log', which displays its contents. The log file content is a large block of text showing multiple error messages from a ClickHouse server, primarily related to TCPHandler.receiveHello() errors and ServerErrorHandler exceptions. The log file is dated 2022-06-27 at 09:54:48.427104 [654369].

QoE Stor Nodes

The "QoE Stor Nodes" block contains the user's servers.

To create or view a custom server that provides work access in the "QoE Stor Logs" section, go to

Update the file list

To update the list of files, click on the "**Update**" button located in the toolbar.

To filter the list of files, enter the keyword by which the search will be performed.

To view the contents of the file, double-click on the selected file. A form with information will open on the right.
