1 Section selection and parameter editing

To change the settings, select the desired section from the list (on the left),

[photo](#)

an editing form with the available set of parameters will open on the right.

Edit the desired settings. Click [Save](#).

For each parameter, you can see the description by clicking the Question button to the right of the corresponding parameter

[photo](#)

We recommend reading the description before changing the parameter. Some parameters are not recommended to be changed. This will be indicated in the description.
