Authorization in VAS Cloud by token 3

Authorization in VAS Cloud by token

For convenient login to VAS Cloud you can configure authorization by token. It allows a GUI-authorized user to visit VAS Cloud without re-authorization.

Authorization by token is relevant for those who use VAS Cloud subscriptions. The token is bound to the user and is perpetual.

The token is specified under Administrator → GUI configuration → VasCloud settings → VAS Cloud API token.

To issue a token, contact [technical support](#), specifying the name of the company and the user for whom you want to issue the token.
