2 Health map	3
<i>Description</i>	3

2 Health map

To go to the Health map section, open the LAWFUL INTERCEPTION menu and HEALTH MAP.

The screenshot shows the VAS Experts interface with the following details:

- Left sidebar:** Contains sections like SSG control, PCRF control, QoE analytics, VAS cloud services, and Lawful interception. Under Lawful interception, there are sub-options: Connections, Traffic generation, Traffic capture, Traffic decode, Traffic decode logs, Cloning a website, Network audit, and Health map (which is selected).
- Top navigation:** Shows "Lawful interception > Health map".
- Content area:** A grid of service status cards:
 - ASN API:** [ERROR][7]: Failed connect to localhost:20000; Connection refused (Status: Critical, Orange background)
 - CKAT DPI:** [INFO]: fastdpi-11.2-0.x86_64 (Status: Success, Green background)
 - localhost:** [INFO]: success (Status: Success, Green background)
 - Site clone (wget):** [ERROR][401]: Ssh not connected (Status: Critical, Orange background)
 - Network audit (nmap):** [ERROR][401]: Ssh not connected (Status: Critical, Orange background)
 - Trojan:** [ERROR][401]: Ssh not connected (Status: Critical, Orange background)
 - GUI DB:** [INFO]: dplu2 (Status: Success, Green background)
 - supervisor:** [INFO]: active (Status: Success, Green background)
 - Cronie:** [INFO]: * * * * * php /var/www/html/dplu2/b scheduler/run >> /dev/null 2>&1 * * * * systemctl status supervisor & > /dev/null || systemctl restart supervisor >> /dev/null 2>&1 01 * * * * sh /var/qester/beckend/c > /dev/null 2>&1 @daily sh /var/qester/beckend/c > /dev/null 2>&1 * * * * sh /var/qester/beckend/c > /dev/null 2>&1
 - Tcpdump:** [INFO]: tcpdump-4.9.3-2.e10.x86_64 (Status: Success, Green background)

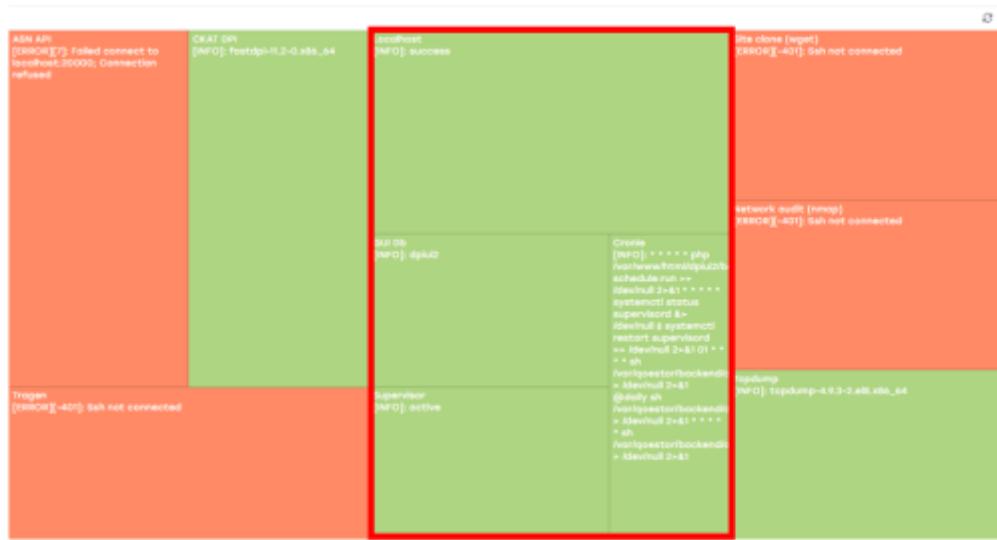

This section is designed to check the health of all services.

 - Tcpdump:** [INFO]: tcpdump-4.9.3-2.e10.x86_64 (Status: Success, Green background)

ASN API. Contains information about IP-addresses.
CKAT DPI. Information about traffic monitoring and analysis.
Tragen.

localhost. Information about the status of this host.

GUI Db. Information about the database interface.

Cronie. Information about tasks performed by the task scheduler.

Supervisor. Contains information about the system designed to manage services.

Site clone (wget). Information about the status of the "Website Cloning" section for this host.

Network audit (nmap). Information about the status of the "Network Audit" section for this host.

Tcpdump. General information about the status of the sections "Traffic generation", "Traffic capture", "Traffic analysis", "Traffic analysis logs" for this host.
