3 Traffic decode logs

To go to the Traffic decode logs section, open the LAWFUL INTERCEPTION menu and TRAFFIC DECODE LOGS.

This section contains a list of pcap servers and tasks created by the user in the "Traffic Analysis" section. This list can be filtered by the line number of the list, date, type, action, type of parsing, status and description.

Updating the list

To update the list, click on the "Update" button located on the right in the toolbar.

Contents of the log file

To view the file, click on the "Information" button located to the right of each item in the list.

Deleting a list row

To delete a line in the list, click on the **"Delete"** button located to the right of each item in the list.

The image shows a single row in a table. The row contains the following data: '1', '10/02/2022 11:19:00', 'Prog', 'Send/Rejection', 'Qualified', and 'Sub not connected'. To the right of the last cell, there is a small square button with a trash can icon, which is highlighted with a red border. Above the table, there are several dropdown menus and a search icon.

1	10/02/2022 11:19:00	Prog	Send/Rejection	Qualified	Sub not connected	
---	---------------------	------	----------------	-----------	-------------------	-------------------------------------------------------------------------------------
