# Raw Fullflow compression

## Configuration settings

Move: Administrator → GUI Configuration → QoE Stor: Raw log aggregation settings

There are 3 settings:

1. QoE Stor aggregation time interval in hours

Set the raw log aggregation time interval is recommended to be at least 2 hours

2. Parallel processing partitions number

3. Log level detalization

Also necessary move: Administrator → Configuration QoE Stor → Fullflow log settings

There you can find: "Enable FULLFLOW log background compressing"

## View aggregated raw logs Fullflow

Move: QoE analytics → Administrator → Tablesapce info → Aggregation raw logs fullflow info

The section that opens displays information about completed tasks for compressing the raw fullflow log with the ability to set a filter by time, as well as delete tasks.
