Raw Fullflow compression

Configuration settings

Step 1. Go to Administrator \rightarrow GUI Configuration \rightarrow QoE Stor: Raw Log aggregation settings.

Set the values for all three parameters.

It is recommended to set the "QoE Stor aggregation time interval in hours" setting to more than 2 hours.

Fullflow Raw Log Compression Logs

Go to QoE analytics \rightarrow Administrator \rightarrow Tablesapce info \rightarrow Aggregation raw logs fullflow info

The section that opens displays information about completed tasks for compressing the raw fullflow log with the ability to set a filter by time, as well as delete tasks.
