VIP Subscriber 3

Management 3

VIP Subscriber

VIP Subscriber — a special subscriber whose traffic is passed with a dedicated priority (by default cs0) regardless of the priority settings for application protocols. The dedicated priority is set in the configuration file with the parameter `special_dscp`.

Privileges: Free access to applications and resources that have usage restrictions.

[Description of VIP subscriber settings in the GUI](#)

Management

Command format:

```
fdpi_ctrl command --service 15 [list of options] [list of IPs or login]
```

Activate the service:

```
fdpi_ctrl load --service 15 --ip 192.168.1.1
```

or

```
fdpi_ctrl load --service 15 --login DEMO
```

For more details on command syntax and ways to specify IP addresses, see the section [Service and policing management](#)
