Saving Filter Profiles	i	. 3
------------------------	---	-----

Saving Filter Profiles

The filters configured in the scenarios can be saved as profiles for quick application in future report usage. To do this:

1. Click on "+" on the left side of the filter configuration window, under the "Saved" tab to create a profile and give it a name:

	🔀 Saved	3 History
+		g
	Title	
	Q Filter	/
	Subscriber list	Û

- 2. Fill in the desired filters and mark them as enabled. Examples: Description and cases
- 3. Click on the "Save Filter" button

+		e	+ ⇔ m Subscriber list Save f					filter		
	Title				Filter	Operator	Value			
	Q, Filter			Off	Host	like		1		Ċ
2	Subscriber list	Û	ø	On	Subscriber	in	185.104.6.50 91.243.36.192 5.183.	1	đ	Ċ
				Off	Login	like		۲		Ċ
				Off	Host IP	like		۲		Ċ
				Off	Protocol	like		0		Ċ
				Off	App protocols	in				Ċ
				Off	Application pre	like		۲		Ċ
				Off	Subscribers As	like		1		Ċ
				Off	Host's AS num!	like		T		Ċ
				Off	Host category	in				Ċ
<<	< 1 > >>			Off	Infected traffi	in				Ċ

Filter profiles are saved within a single section. This means profiles created in the "NetFlow" section can be applied to all reports in that section, but will not be available in the "Raw Full NetFlow", "Clickstream", and other sections.

> The description of all available filters by section and the operators applied to them can be found on the page Filter and operator lists
