Configuration and Setup 3

Configuration and Setup

The configuration process consists of several stages:

- [Date, time, and time zone configuration](#)
- [Disk space configuration](#)
- [IPFIX receiver configuration](#)
- [Filtering configuration](#)
- [IPFIX export configuration from SSG to QoE](#)
- [Database user configuration](#)
- [NAT Flow configuration](#)
- [Sharding configuration and QoE cluster setup](#)
- [Fullflow raw log compression](#)
