DPI platform update to version 4.1	3
---	----------

DPI platform update to version 4.1

Changes in version 4.0 Leningrad 872¹⁾

1. Added independent control and policing of virtual channels based on VLAN or DNA
2. Added named profiles for policing (rate plans) and services
3. Added custom profiles for services - white list/black list и subscriber notification
4. Added managed service of subscriber protection from external DOS/DDOS attacks
5. Added marketing company management in DPI GUI
6. Added Captive Portal example for WiFi access using SMS authorization

[Update manual](#)

To check the currently installed version:

```
yum info fastdpi
```

Downgrade to previous version:

```
yum downgrade fastdpi-3.2
```

Do not update Linux kernel to the latest version kernel-2.6.32-431.29.2 or above. This kernel is not binary compatible with Kernel ABI. The network driver can not be loaded after this update. In case you made this update - please configure grub loader to load the previous version while solving the problem ²⁾.

Check what's new in [previous version](#).

¹⁾

In memory of the heroic defense of Leningrad and the complete lifting of the blockade after 872 difficult days , the blockade lasted from September 8, 1941 to January 27, 1944 recommend listening to [speech of writer Daniel Granin in the Bundestag](#)

²⁾

Set the parameter default=1 in the file /etc/grub.conf
