DPI platform update to version 2.3	3
---	----------

DPI platform update to version 2.3

Changes in version 2.3 Polar Bear:

1. Bug fix: policing configuration changes for subscribers having several IPs did not work.
2. Netflow shaping was added to avoid losses on weak collectors.

[Update manual](#)

Do not update Linux kernel to the latest version kernel-2.6.32-431.29.2 or above. This kernel is not binary compatible with Kernel ABI. The network driver can not be loaded after this update. In case you made this update - please configure grab loader to load the previous version while solving the problem¹⁾.

Check what's new in [previous version](#).

¹⁾

Set the parameter default=1 in the file /etc/grub.conf
