Version 5.7 и 5.7.1:

1. Fixed CG-NAT errors (in 5.7.1 for multicluster systems)

2. Added HTTP block by IP:PORT (for proxy blocking in general mode)

To check current installed version use command:

yum info fastdpi

Rollback to 5.3:

yum downgrade fastdpi-5.3

After upgrade or version change restar of service is required:

service fastdpi restart

Do not upgrade Linux core to prevent bunary incompatibility with Kernel ABI and DNA drivers. If you upgraded the Linux core then for temporary problem solution use the setting in gub to load previous Linux core (in file /etc/grub.conf set default=1).
