Make sure that your appliance meets requirements:

[hardware requirements](#)

First, install CentOS 6.5:

[ISO CentOS 6.5 minimal](#)

[ISO CentOS 6.5 minimal official site](#)

Second, create the new user vasexpertsmt (you make the password by yourself).

The user must have privilege - sudo or su.

Set up the ssh access restrictions:

```
5.200.43.0/24, 193.218.143.187, 93.100.47.212, 77.247.170.134, 5.200.32.250
```

Send us server IP, SSH port, vasexpertsmt and password to email: servicedesk@it-grad.ru
