

Table of Contents

Make sure that your appliance meets requirements:

[hardware requirements](#)

First, install CentOS 6.5:

[ISO CentOS 6.5 minimal](#)

[ISO CentOS 6.5 minimal official site](#)

Second, create the new user vasexpertsmt (you make the password by yourself).

The user must have a privilege - sudo or su.

Set up the ssh access restrictions:

```
94.140.198.64/27, 78.140.234.98, 5.200.43.10, 193.218.143.187,  
93.100.47.212, 77.247.170.134
```

Send us server IP, SSH port, vasexpertsmt and password to email: sd@vas.expert
