This service is configured on individual subscribers' level by [fdpi_ctrl](#).

Instruction format:

```
fdpi_ctrl command --service 6 [IP_list]
```

You can find more details on the instruction syntax and IP specification methods here: [Control instructions](#)

Examples:

To activate notification for a particular subscriber:

```
fdpi_ctrl load --service 6 --ip 192.168.0.1
```

After successful notification the service is switched off automatically.
